

IN THE SPECIFICATION

Please replace paragraph [0027] with the following paragraph:

[0027] A known jack screw 18 is provided adjacent the second side 22 of the cable ~~connector 20~~ connector 12. The jack screw 18 extends above the top surface 24 of the cable connector 12 for clear access thereto, and by rotating the jack screw about its axis 48, the jack screw 18 may be securely mated or unmated to the mating connector 14, and more specifically to the latch block 32, to mate and unmate the cable connector 12 to and from the end 34 of the mating connector 14.
